

STIMULATE™

Microbial-Based Biological Amendment

GENERAL INFORMATION: STIMULATE™ is a highly concentrated microbial liquid formulation of beneficial microorganisms specifically selected to convert unavailable nutrients to usable forms that work together to improve soil and plants. STIMULATE can be applied to the seed, soil, or foliage at any growth stage with positive benefits. STIMULATE works continually from application to harvest to improve yield.

DIRECTIONS: Use 8 to 16 oz/A at planting or broadcast to the soil; 6 to 8 oz/A as a foliar application; and 0.5 to 6 oz/100 lb as a seed treatment. STIMULATE can be applied in fertilizer solutions or used in tank-mixtures with pesticides. There are no known mixing issues. STIMULATE can substitute for the water carrier in seed treatment mixtures.

STORAGE: For optimum performance, store under cool conditions. Avoid high heat and freezing temperatures.

SAFETY INSTRUCTIONS: STIMULATE contains non-genetically modified and non-pathogenic microorganisms. It is non-corrosive. The product meets local, state, and federal health and transportation requirements. Keep out of reach of children.

CONTAINS NON-PLANT FOOD INGREDIENTS

GUARANTEED ANALYSIS

SOIL AMENDING INGREDIENTS

Mixture of microbial species	4.35% (nominal)
<i>Azospirillum brasilense</i>	1x10 ⁴ CFU/mL
<i>Bacillus amyloliquefaciens</i>	1x10 ⁶ CFU/mL
<i>Bacillus subtilis</i>	1x10 ⁶ CFU/mL

INERT INGREDIENTS

Total Other Ingredients	95.65% (nominal)
