

GENERAL INFORMATION

REMOVE™ spray system cleaner is a powerful, concentrated cleaning material. Some spray residues are very difficult to completely clean out of the spray system. This creates a major challenge for the applicator. **REMOVE™** is formulated to clean almost any residue and has been approved for the removal of sulfonyleurea herbicides.

DIRECTIONS

1. Read and follow the pesticide label for directions for cleaning out the spray system.
2. Use 1 qt/100 gal to remove most chemical residues. Use 2 qt/100 gal or higher concentrations to remove difficult to clean residues.
3. Experience is the best guide to determine the proper rate to add. Take into account the characteristics of the chemicals to be removed and their physical state.
4. Make sure that the cleaning solution contacts all internal surfaces. Flush. Rinse and properly dispose of all rinsate.

Allow the **REMOVE™** solution to remain on all surfaces long enough to penetrate the chemical spray residues. This process can take a few minutes or much longer depending on the physical state of the residues.

REMOVE™

SPRAY SYSTEM CLEANER

WARNING

KEEP OUT OF REACH OF CHILDREN

This product is corrosive.

May cause severe eye and skin damage.

Read Safety Data Sheet (SDS) before using this product.
